"There are some people who leave impressions not so long lasting as the imprint of an oar upon the water"

Kate Chopin - Novelist

Yes, first impressions are important. Like the warmth behind a pretty smile that says a friend is near or the bark of a dog that warns you to stay away. But it's the lasting impression that calls you back again to a place that has left an indelible imprint on your mind.

At MMB Website Design, we design websites that create positive first impressions that appeal to your customer's interests and needs, and design them in such a way as to leave a lasting impression that beckons them to return. Smart and classy designs, cutting edge graphics, and ease of use, create an enhanced browsing experience that are sure to bring your customers back again and again.

- Website Design - Focuses on the look and feel
• Website Development - Planning, analysis, design and implementation of a website
